About INNOVO and its Health Innovation Vehicle

INNOVO is a sustainability-centred network bringing buyers and suppliers together to do business: We enable reduced spend through aggregation, increase customer appeal and access to innovations across sectors. The Health Innovation Vehicle has been focused on personal protection and infection control.

Products certified for reference markets:

- We are directly connected with the most established and experienced suppliers, dealing only in certified, validated items from whitelisted sources
- We scout for innovations that are solving the pressing problems in health

Shortest chain:

- INNOVO takes no payment from the buyer – your transaction is direct with supplier
- A “commercial concierge” connects you directly to the factory mandate or to an adviser who can meet your needs through their own direct relationships
- We are also set up to work with your current supply chain, to reduce your costs by gaining rebates from them

Lower costs:

- Our service is entirely funded from a share of the rebates our suppliers can give from matching them with qualified customers. Rebates are distributed through PwC
- We relentlessly source the most reliable stock at a fair price through our member companies and advisers

Direct purchase from Innovators and Partner Manufacturers

1. Early Interception (Anosmia) Test for asymptomatic CoViD cases
2. Disinfection tunnels for personnel or deliveries at entry / exit points
3. Respirator masks from world's 5th biggest healthcare company*
 - N99 / FFP3; N95 / FFP2 and other face protection, all fully certified and white-listed

5. Access to the full range of PPE and infection control through our network of advisers and distributors, including the NITRILE GLOVE market

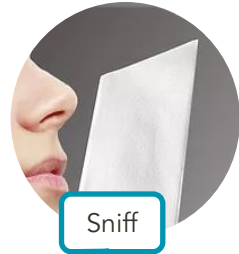

Further innovations in nanotech / materials / recyclables coming online

*Forbes 2020 by revenues

1. Breakthrough FDA-Certified Early Warning on CoViD-19

Anosmia (losing sense of smell) has proven an early warning of CoViD-19 before any other symptoms show. But people often don't notice this or test themselves for it.

Anosmia is 10x more prevalent than cough or fever; 80% CoViD-positive people report anosmia; and 100% of asymptomatic CoViD carriers infect others.*

Uniquely registered as a CLASS II Exempt Medical device by US FDA (Food & Drug Administration) Scientific design against clinical anosmia testing protocols; metered-dose inhaler technology to dispense distinct aromas onto a disposable, sterile test sheet. Sniff the sheet, Confirm the scent. Result.

Efficient and economical - screen in 5 seconds, no specialised personnel nor training required, a fraction of the cost and time of a test, so you can isolate and/or prioritise for a clinical test.

Ideal for workplaces; manufacturing, offices, hospitality, retail, leisure and transport and schools

- NON-INVASIVE, DRY and CONTACTLESS No swabs, personal contact, nor cross contamination
- METERED DOSE PRECISION Dispenses a consistent, exact amount of aroma to detect
- ECONOMICAL & SCALABLE 560 tests per kit, less than \$0.60 / £0.45 / €0.50 per person
